2008 Health Tracking Physician Survey Public Use File: Codebook (Release 1)

600 Maryland Avenue, SW Suite 550 Washington, DC 20024 www.hschange.org

Technical Publication No.

79

January 2010

2008 Data Introduction

This codebook describes the 2008 Health Tracking Physician Survey Public Use File, HTS08PP1.TXT. The file, which is distributed in ASCII format, contains 212 variables and 4,720 physician-level records. The unique record identifier and sort key is the variable PHYSIDX. In addition to this introduction, the codebook consists of three parts, an alphabetical listing of the variables, a positional listing of the variables, and the main portion of the codebook containing counts, percentages, and descriptive information on a variable-by-variable basis.

Codebook Sections

The variables included on the file are grouped and ordered based on the questions appearing in the various sections of the survey instrument, with two additional sections for non-questionnaire related variables. Imputation flags follow the corresponding imputed variable while constructed variables are inserted next to, or in some cases, in place of the applicable survey questionnaire variable.

Survey Administration Variables
Satisfaction with Medicine
Practice Characteristics
Hours Worked and Patient Visits
Patient Characteristics
Information Technology in Medicine
Hospital Care
Quality and Coordination of Patient Care
Practice Acceptance of New Patients
Sources of Practice Revenue
Medical Malpractice
Medical Equipment and Hospital Ownership
Compensation
Personal Background
Weights and Sampling Variables

Variable Listings

The codebook contains lists of the variables on the file in alphabetical and positional order. Each list includes the variable name, start and end column position, and a brief description or label for the variable. This description is prefaced by the following indicators: "PH" indicates the Physician Survey, and "5" indicates that this is the fifth physician survey conducted by the Center for Studying Health System Change.1 The questionnaire item number, "CV" to denote a constructed variable, or "AMA" to denote a variable from the external AMA file follows these indicators. The same descriptions are also provided in the LABEL statement section of the SAS user file provided with the public use file.

Release 1, January 2010 Page 1 of 2

¹ While the 2008 Health Tracking Physician Survey is the fifth physician survey, it is distinct from its predecessor, the Community Tracking Study (CTS) series, which comprise the first four surveys. Estimates from the 2008 physician survey should not be compared with those from the CTS physician surveys because of changes in survey administration from telephone to mail, question wording, skip patters, sample structure and population represented.

Main Codebook

The main portion of the codebook follows the alphabetical and positional listings. Unweighted counts, cumulative counts, percentages, and cumulative percentages for each variable are displayed. The counts and percentages for each variable are arranged such that valid, non-missing data appear first, followed by missing data ("-9 Not Ascertained"), and concluding with inapplicable ("-1") responses which were not asked due to skip pattern logic. In addition, a number of informational fields about each variable are included to assist the user in working with the data. These include:

Variable Name: Alphanumeric name for the variable, limited to 8 characters in length.

Variable Type: Numeric or character variable.

Length: Variable length and number of decimal places.

Start/End: Start and end columns in the ASCII data file.

Question: Questionnaire item number and text. For variables corresponding directly to a

questionnaire item, the question number and text of the related questionnaire item are provided in the Question field. For constructed, survey administration, and weight and sampling variables, the Question field has a value of "N/A" to

denote a non-questionnaire related item.

Description: Brief description of the variable, primarily used with constructed or non-

questionnaire variables.

Universe: Defines the set of individuals eligible to be asked the question, regardless of

whether they responded. Physicians not included in the Universe for a particular variable were assigned a value of "-1 Inapplicable". Note that if Universe is not

defined, it means that the question was asked of all physicians.

Additional information on variable construction and editing, as well as specific information on selected variables is included in Chapters 4 and 5 of the User Guide. To obtain national estimates using this file, users should refer to the information on sample design and estimation included in Chapter 2 of the User Guide. In addition, Chapter 3 of the User Guide provides information on deriving appropriate variance estimates.

Survey Administration Variables

Variable NameVariable TypeLengthStartEndPHYSIDXNumeric6.016

Question: N/A

Description: Unique identifier for each physician.

Value	Count	Cum	Percent	CumPct
500001-504720	4,720	4,720	100.0	100.0

BIRTHX Numeric 2.0 7 8

Question: N/A

Description: Year of birth. This information was obtained from the American Medical Association (AMA). For confidentiality reasons, this is a categorical variable which groups years together into approximate 5 year intervals. Years before 1941 were bottom coded (BIRTHX=1), and years after 1970 were top coded (BIRTHX=8).

Value	Count	Cum	Percent	CumPct
1: 1940 or earlier	292	292	6.2	6.2
2: 1941-1945	335	627	7.1	13.3
3: 1946-1950	571	1,198	12.1	25.4
4: 1951-1955	795	1,993	16.8	42.2
5: 1956-1960	815	2,808	17.3	59.5
6: 1961-1965	735	3,543	15.6	75.1
7: 1966-1970	693	4,236	14.7	89.7
8: 1971 or later	484	4,720	10.3	100.0

GENDER Numeric 2.0 9

Question: N/A

Description: Gender. This information was obtained from the American Medical Association

(AMA).

Value	Count	Cum	Percent	CumPct
1: Male	3,470	3,470	73.5	73.5
2: Female	1,250	4,720	26.5	100.0

Release 1, December 2009 Page 4 of 84

Practice Characteristics

Variable Name	Variable Type	Length	Start	End
OWNPR	Numeric	2.0	23	24

Question: Q6

This question is about your main practice, that is, the business or organization that compensates you. In your main practice, are you a full owner, a part owner (e.g., with one or more other physicians), an employee with no ownership, or an independent contractor?

Value	Count	Cum	Percent	CumPct
1: Full owner	1,442	1,442	30.6	30.6
2: Part owner	1,246	2,688	26.4	56.9
3: Employee	1,810	4,498	38.3	95.3
4: Independent contractor	222	4,720	4.7	100.0

PHYSOWN Numeric	2.0	25	26
------------------------	-----	----	----

Question: Q6a 1

If you are a part owner or employee, do any of the following have an ownership interest in your main practice? Check all that apply: Other physician(s) in the practice.

Universe: Physicians who are part owner or employee (OWNPR=2,3).

Value	Count	Cum	Percent	CumPct
0: No	1,459	1,459	30.9	30.9
1: Yes	1,597	3,056	33.8	64.7
-1: Inapplicable	1,664	4,720	35.3	100.0

HMSOWNX	Numeric	2.0	27	28

Question: N/A

Description: This variable indicates that only a hospital, a medical school, or a hospital and a medical school have an ownership interest in your main practice. This variable was constructed from question 6a.

Universe: Physicians who are part owner or employee (OWNPR=2,3).

Value	Count	Cum	Percent	CumPct
0: Not solely a hosp or medical school	1,938	1,938	41.1	41.1
