CTS Household Survey Restricted Use File

2003 Data

Introduction

This codebook describes the Community Tracking Study 2003 Household Survey restricted use file, CTSR4HR1.TXT. The file, which is distributed in ASCII format, contains 496 variables and 46,587 person-level records. The unique record identifier and sort key is the variable PERSIDX, a concatenation of the family insurance unit identifier (CSIDX) and the person number assigned to each member of the household (PID). In addition to this introduction, the codebook consists of three parts, a positional listing of the variables, an alphabetical listing of the variables, and the main portion of the codebook containing counts, percentages, and descriptive information on a variable-by-variable basis.

Codebook Sections

The variables included on the file are grouped and ordered based on the questions appearing in the various sections of the survey instrument, with two additional sections for non-questionnaire related variables. Imputation flags follow the corresponding imputed variable while constructed variables or variables masked for confidentiality are inserted next to, or in some cases, in place of the applicable survey questionnaire variable.

	Survey Administration Variables
Section A:	Household Composition and Demographic Characteristics
Section B:	Health Insurance Coverage
Section C:	Health Care Resource Use
Section D:	Usual Source of Care and Patient Trust
Section E:	Health Care Satisfaction, Last Physician Visit, and Activity Limitations
Section F:	Employment
Section G:	Family Income and Race
Section H:	Closing Questions
	Weights and Sampling Variables

Variable Listings

The codebook contains lists of the variables on the file in alphabetical and positional order. Each list includes the variable name, start and end column position, and a brief description or label for the variable. This description is limited to 40 characters and is prefaced by the following indicators: "H" indicates the Household Survey, "F" or "P" indicates the source of the variable as either family or person, and "4" indicates the round of data collection (2003). The questionnaire item number or "CV" to denote a constructed variable follows these indicators. The same 40 character descriptions are also provided in the LABEL statement section of the SAS user file provided with the public use file.

Main Codebook

The main portion of the codebook follows the alphabetical and positional listings. Unweighted counts, cumulative counts, percentages, and cumulative percentages for each variable are displayed. The counts and percentages for each variable are arranged such that valid, non-missing data appears first, followed by missing data ("-8 Don't Know"), and concluding with inapplicable ("-1") responses which were not asked due to skip pattern logic. In addition, a number of informational fields about each variable are included to assist the user in working with the data. These include:

Variable Name: Alphanumeric name for the variable, limited to 8 characters in length.

Source: Indicates whether the variables are measured at the household, family, or person-level. The data file is organized as a person-level file, with household or family characteristics attached to each person's record. For variables with Source indicated as Household, all

persons in a household have the same value for that variable, and for those with Source indicated as Family, all persons in a family insurance unit have the same value for that variable.

Variable Type: Numeric or character variable.

Length: Variable length and number of decimal places.

Start/End: Start and end columns in the ASCII data file.

Question: Questionnaire item number and text. For variables corresponding directly to a questionnaire item, the question number and text of the related questionnaire item is provided in the Question field. For constructed, survey administration, and weight and sampling variables, the Question field has a value of "N/A" to denote a non-questionnaire-related item.

Description: Brief description of the variable, primarily used with constructed or non-questionnaire variables. Note that for self-response module (SRM) variables, the corresponding question number in the child proxy section and/or in the self-response module is indicated in the description.

Universe: Defines the set of individuals eligible to be asked a question, regardless of whether they responded. Persons not included in the universe for a particular variable were assigned a value of "-1 Inapplicable".

Additional information on variable construction and editing, as well as specific information on selected variables is included in Chapter 5 of the User Guide. To obtain site-specific or national estimates using this file, users should refer to the information on sample design and estimation included in Chapter 3 of the User Guide. In addition, Chapter 4 of the User Guide provides information on deriving appropriate variance estimates.

Survey Administration Variables

Variable Name	Source	Variable Type	Length	Start	End
HHIDX	Household	Numeric	7.0	1	7

Question: N/A
Description: Unique identifier for each household.
Universe: All persons.

Value	Count	Cum	Percent	CumPct
4000001-4020998	46,587	46,587	100.0	100.0

CSIDX	Family	Numeric	8.0	8	15
-------	--------	---------	-----	---	----

Question: N/A
Description: Unique identifier for each family insurance unit, or FIU. Unless indicated otherwise, all references to "family" in this codebook refer to the family insurance unit.
Universe: All persons.

Value	Count	Cum	Percent	CumPct
40000012-40209982	46,587	46,587	100.0	100.0

PID	Person	Numeric	2.0	16	17
-----	--------	---------	-----	----	----

Question: N/A
Description: Unique number assigned to each person within the household.
Universe: All persons.

Value	Count	Cum	Percent	CumPct
1-8	46,587	46,587	100.0	100.0

PERSIDX	Person	Numeric	9.0	18	26
---------	--------	---------	-----	----	----

Question: N/A
Description: Unique person identifier. PERSIDX is the sort key and unique record identifier for the file and was constructed by concatenating the family identifier (CSIDX) and person number (PID).
Universe: All persons.

Value	Count	Cum	Percent	CumPct
400000121-402099824	46,587	46,587	100.0	100.0

Survey Administration Variables

Variable Name	Source	Variable Type	Length	Start	End
RSPFLAG	Person	Numeric	2.0	58	59

Question: N/A

Description: Constructed variable that identifies the family informant.

Universe: All persons.

Value	Count	Cum	Percent	CumPct
0: Not informant	21,168	21,168	45.4	45.4
1: Informant	25,419	46,587	54.6	100.0

Variable Name	Source	Variable Type	Length	Start	End
FIUFLAG	Person	Numeric	2.0	60	61

Question: N/A

Description: Constructed variable that can be used to produce a family-level file. Selecting records with a value of "1" will extract the FIU family informant record or the record of the oldest person in the family in FIU's without a family informant.

Universe: All persons.

Value	Count	Cum	Percent	CumPct
0: No	21,168	21,168	45.4	45.4
1: Yes	25,419	46,587	54.6	100.0

Variable Name	Source	Variable Type	Length	Start	End
SRMFLAG	Person	Numeric	2.0	62	63

Question: N/A

Description: Constructed variable that indicates the source or status of the Self-Response Module questionnaire.

Universe: All persons 18 or older.

Value	Count	Cum	Percent	CumPct
1: Completed own SR module	36,438	36,438	78.2	78.2
2: SR module completed by proxy	679	37,117	1.5	79.7
3: Missing SR module	2,143	39,260	4.6	84.3
-1: Inapplicable	7,327	46,587	15.7	100.0

Question: N/A

Description: Constructed variable which indicates whether the person had a doctor visit under his or her current insurance plan. In constructing the variable, a comparison was made between the month of the last doctor visit and the insurance enrollment month. The hierarchically constructed variable INSTYPE, which categorizes insurance coverage for each person, was used to define the insurance coverage.

Universe: All persons who completed the main questionnaire or who completed the self response module (either in-person or by proxy), and had a physician visit in the previous twelve months and reported either a checkup or care for sickness, and had a nonmissing insurance enrollment month. Universe includes children who had any physician visit in the past 12 months, and reported either a checkup or care for sickness, and had a nonmissing insurance enrollment month, and a family member took the child to the last physician visit.

P6X	Household	Numeric	10.7	1115	1124
-----	-----------	---------	------	------	------

Question: N/A
Description: Joint psu inclusion probability #6.
Universe: All persons.

Value	Count	Cum	Percent	CumPct
< 1.0	5,775	5,775	12.4	12.4
-1: Inapplicable	40,812	46,587	87.6	100.0

P7X	Household	Numeric	10.7	1125	1134
-----	-----------	---------	------	------	------

Question: N/A
Description: Joint psu inclusion probability #7.
Universe: All persons.

Value	Count	Cum	Percent	CumPct
< 1.0	5,775	5,775	12.4	12.4
-1: Inapplicable	40,812	46,587	87.6	100.0

WTFAM2	Family	Numeric	12.6	1135	1146
--------	--------	---------	------	------	------

Question: N/A
Description: Family-level weight for making national estimates. Sum of the weights: 142,473,817
Universe: All persons.

Value	Count	Cum	Percent	CumPct
320-95000	46,587	46,587	100.0	100.0

CTS Household Survey Restricted Use File
